Changes or Bugs that have been documented and how they were approached

Please follow the style shown in the **Code Change Log (let me know if the link's broken)**

Syntax error in oXygen XML editor for the node-set() function. The syntax is correct, and functional, but editor reports false error. Namespace has already been added to header in xsl

- `<xsl:variable name="sumTCPass" select="sum(msxsl:node-set($TCPass)/count)"/>`
